

PEACE INTERNATIONAL SCHOOL

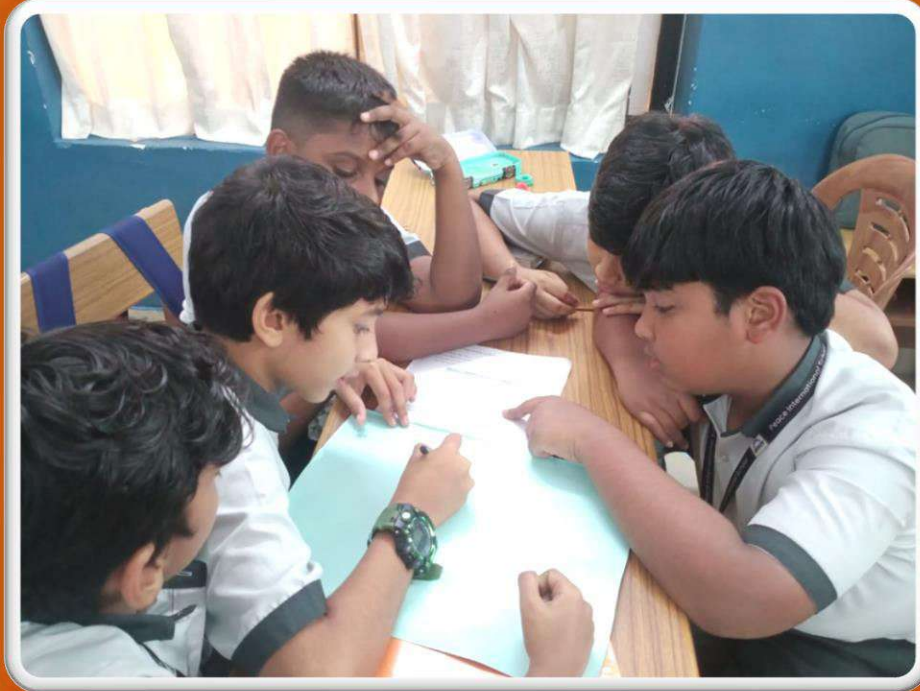

AUGUST ACTIVITIES OF GRADE 4, 5, 6 & 7
MATH DEPARTMENT

**Come and explore
our market!**

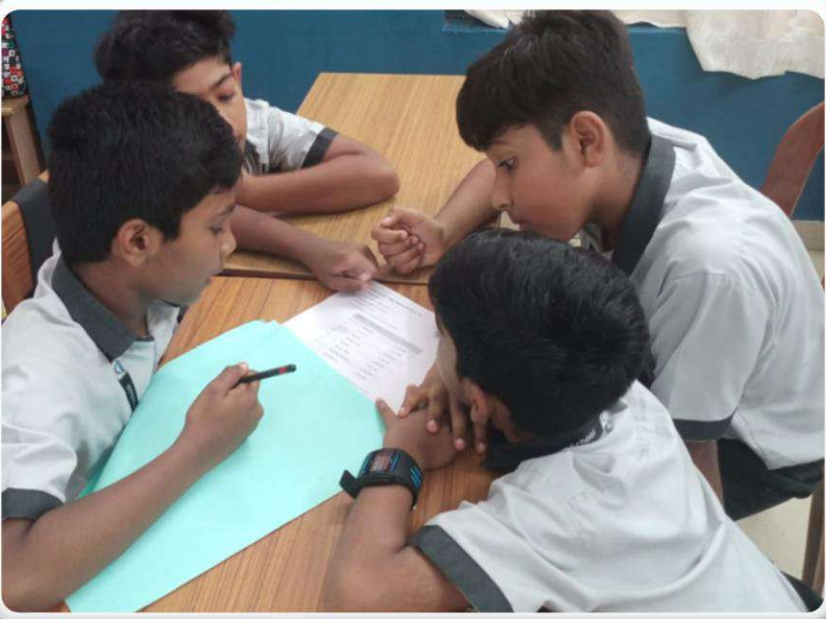

You can buy fruits,
vegetables, and
toys....

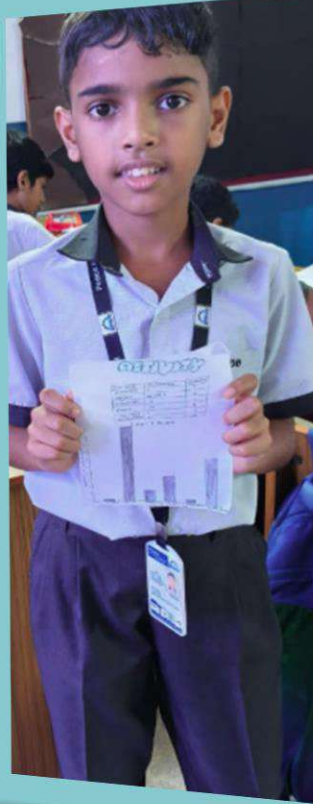

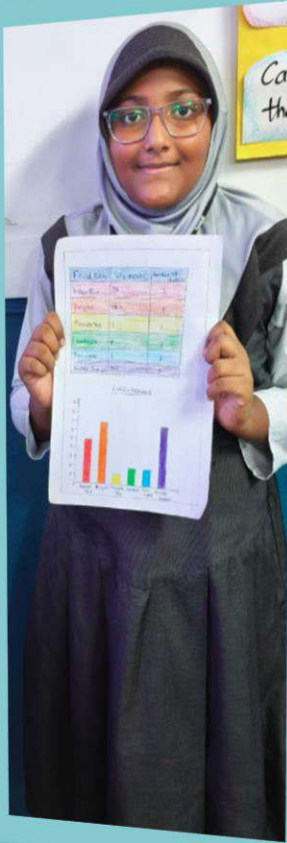

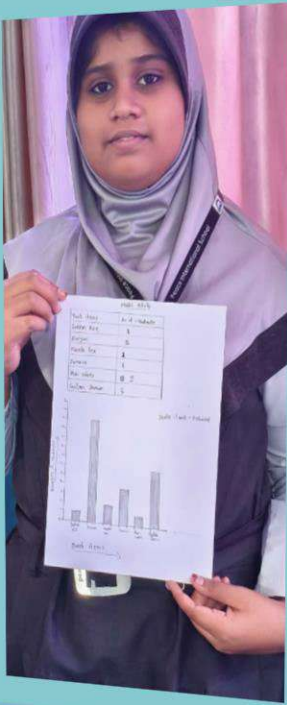

Grade 4 calculates
the total amount
using addition, and
find the balance
using subtraction.

**“Budgeting – A
step towards
smart living”**

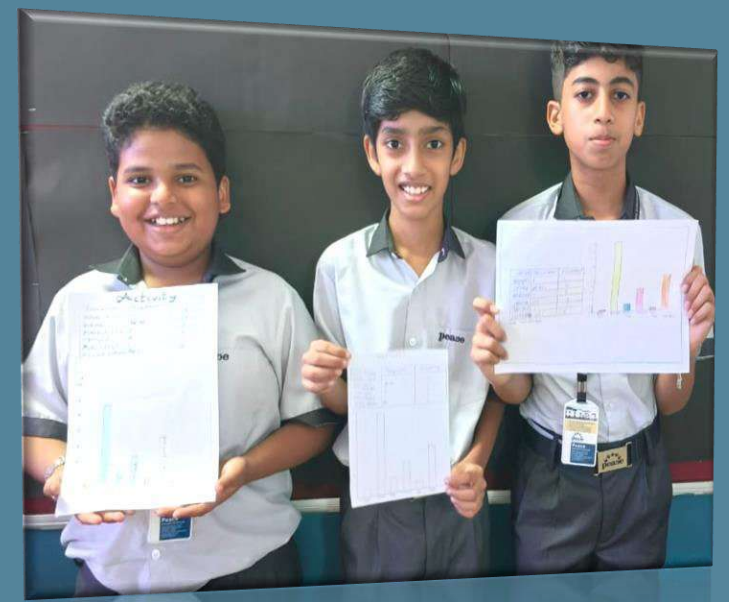

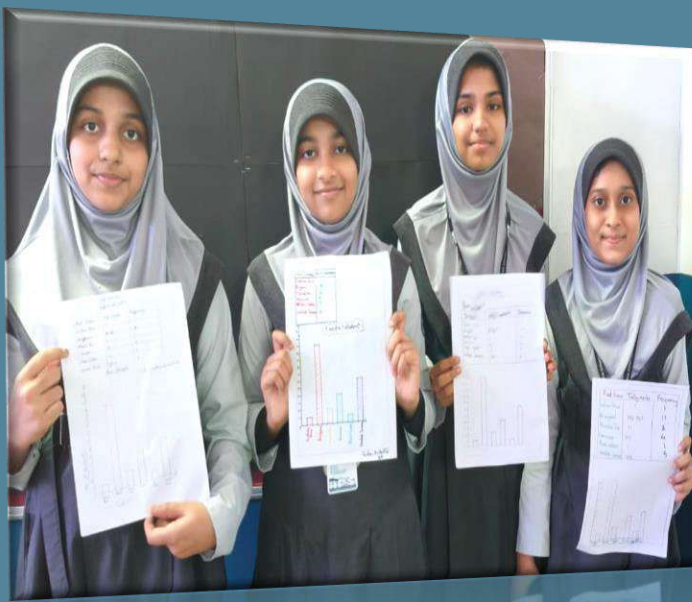

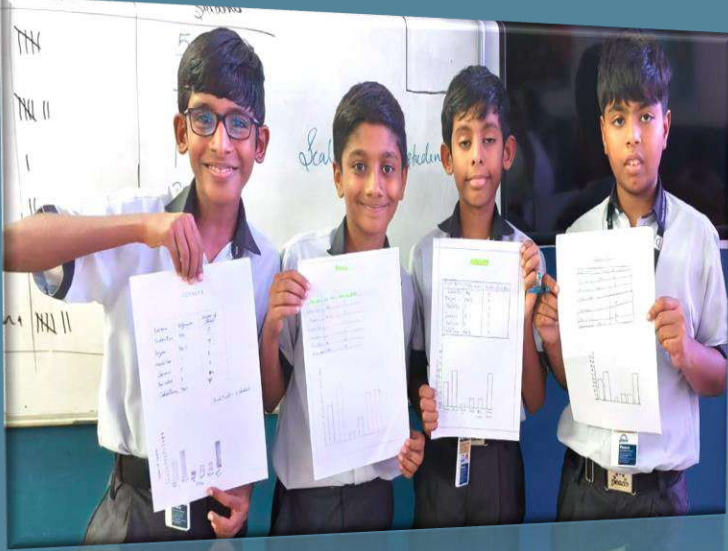

**Grade 5 learners with
budget activity.**

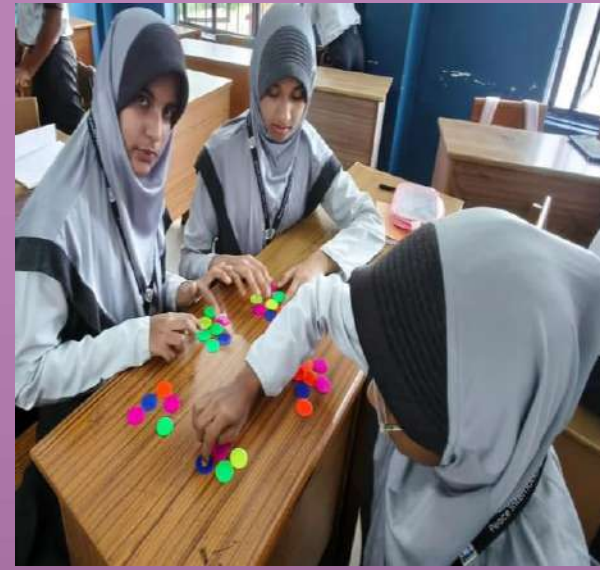

"Data Handling Made Fun!"

Grade 6 students selected their favorite food item, and the data was organized into a frequency table and represented through a bar graph to enhance their understanding of data handling and graphical representation.

"Data Handling Made Fun!"
Grade 6 students selected their favorite food item, and the data was organized into a frequency table and represented through a bar graph to enhance their understanding of data handling and graphical representation.

"Token to Expression"

Grade 7 students formed equal groups and added a few extra tokens, which helped them understand how real situations can be written as arithmetic expressions. They also learned how brackets are useful in showing which part of the expression should be calculated first, making the meaning clear.

Thank you!
