

**PEACE INTERNATIONAL SCHOOL  
DEPARTMENT OF MATHEMATICS  
GRADE-4,5,6,7 and 8  
NOVEMBER ACTIVITIES**

Grade 4 children  
practise division  
with the help of a  
division machine  
and are able to  
explain key division  
terms, including  
dividend, divisor,  
quotient, and  
remainder.

4

**Crafty Angles –  
Learning Geometry  
the Creative Way!  
Through this hands-  
on approach, they  
explored how angles  
are formed and  
learned to identify  
each type based on  
its measure.**

**5**

# 6

## A Prime Puzzle

✖ Through this fun and engaging activity, students explored the concept of prime factorization in a playful way.

**Students actively participated in the activity by measuring their weight using a weighing machine. Students converted weight in kilograms to grams by using the conversion rule individually.**

**7**

# 8

**Some Early Number Systems** 🏹 The students conducted an interactive activity using PPT (PowerPoint) and ChatGPT to explore the topic. This activity helped the students enhance their presentation skills, and use of AI tools in learning.
